

MIRROR HEATER INSTALLATION INSTRUCTIONS

Please note: This product is for use on bathroom mirrors only

FITTING THE HEATER TO THE MIRROR

1. The heater must be fixed to the back of the mirror, **NOT** to the wall.
2. Lay the mirror face down on a protective surface.
3. The back of the mirror must be **absolutely clean, dry and grease free**.
4. Peel off the release paper on the heater and discard the paper.
5. Carefully fix the heater on to the back of the mirror.
6. Ensure that there are no trapped air bubbles and that the heater is in the centre of the mirror.
7. Since the heater has only one continuous heating circuit, it cannot and **MUST NOT** be cut. If it is accidentally cut or torn whilst being installed, it will be rendered useless. **It cannot be repaired**. Please take particular care over this point.
8. It is recommended that the mirror be fitted on to the wall using standard type mirror clips. These clips will allow the mirror freedom to expand and contract as necessary.

ELECTRICAL INSTALLATION INFORMATION

This product must be installed in accordance with the latest Edition IEE Regulations (UK only).

It is recommended that a qualified electrician install the heater.

The power supply cable may be conveniently taken to the lighting circuit in flush mounted plastic trunking. The heater **must be switched**. This may be via the bathroom light, pull cord switch or via a separate pull cord switch incorporating an indicator light (LED).

The largest heater FHO6012 (600mm x 1100mm) consumes 132W of power at 230V, therefore size the supply cable and switch appropriately. If more than one heater is required (for example on a large mirror), connect the heaters in parallel across the supply.

Do not install the heater onto a copper or foil backed mirror. Safety backing is the preferred backing. If the heater is left ON for a long period the mirror may become HOT.

The wires are coloured:

BROWN.....Live
BLUE.....Neutral

**The manufacturer/supplier cannot be held responsible for damage
caused by improper installation**

DO NOT INSTALL THIS PRODUCT INSIDE A SHOWER CUBICLE OR BATH
